Product Benefits & Features

Cook more at the same time and still get a perfect result

The additional heating ring in our oven ensures your dishes are evenly cooked – even when loaded with up to three trays – for corner to corner deliciousness. Sure to make each portion as perfect as the last.

A natural clean with steam

Cleaning after cooking needn't be a chore. Humidity inside the oven creates steam to loosen otherwise stubborn grease and residue left on its surfaces. So you can achieve a natural clean, effortlessly.

All the information you need

The LCD touch-control display on this oven puts cooking time, mode and temperature at your fingertips, and gives you access to pre-programmed recipes.

Cooked Evenly everywhere

With this oven, using energy efficiently also means cooking efficiently. It has a new convection system called Hot Air, which ensures hot air circulates evenly throughout the oven cavity. The result is that the oven heats up faster and cooking temperatures can be reduced by up to 20%, saving you both time and energy

Perfectly bake even the largest batches

Less isn't always more, especially when it comes to delicious baked goodies. The XL Baking Tray is 20% larger than standard-sized baking trays, enabling you to turn out larger batches of sweet treats, with the satisfaction that every single one has been perfectly baked.
