

### Turn flavour up to full

Get the delicious taste you want every time with the 8000 SteamBoost Oven. Just use the Steamify® feature and the oven selects the right steam level for your meal. Effortlessly enhancing your usual cooking with the perk of steam.

## Product Benefits & Features

### Perfect results with the Food Sensor

Thanks to the Food Sensor of this oven you can measure the core temperature from the center of your dish during the cooking process. So you get the perfect results everytime.

### All the information you need

The LCD touch-control display on this oven puts cooking time, mode and temperature at your fingertips, and gives you access to pre-programmed recipes.

### Fast heat-up time, to get you cooking quickly

Superior and quick cooking results - this oven heats up fast, giving you more time to enjoy the meal with your family and friends.

### Cooked Evenly everywhere

With this oven, using energy efficiently also means cooking efficiently. It has a new convection system called Hot Air, which ensures hot air circulates evenly throughout the oven cavity. The result is that the oven heats up faster and cooking temperatures can be reduced by up to 20%, saving you both time and energy

### Cook more at the same time and still get a perfect result

The additional heating ring in our oven ensures your dishes are evenly cooked – even when loaded with up to three trays – for corner to corner deliciousness. Sure to make each portion as perfect as the last.
