- 3 programmed functions can be put in a sequence
- Internal light
- Turntable diameter and material: 272 mm, Glass
- Included accessories: Frame

Microwave - your kitchen shortcut

The microwave function is your shortcut to quick and delicious meals. At the touch of a button, you can melt chocolate, defrost your favourite casserole or re-heat leftovers, fast. It's the quick and easy way to create tasty meals.

Save microwave settings for your favourite dishes

Save your preferred microwave settings for quick and easy access with the Favourite function. Once you've created a programme, you can touch the star-shaped icon on the display to activate it. This means you don't need to remember any specific settings. It's all taken care of, at a touch.

A microwave ReTurntable that remembers where it started

We've designed this microwave oven so that dishes are always in the ideal position. This is because the door unlocks when the ReTurntable returns to where it started. No cup handles facing the wrong way, no hot plates in awkward positions. Just effortless access, every time.

Thaw your food quickly with our defrost function

Your frozen food is ready quickly, thanks to the microwave's defrost function. After you've selected the food type and weight, the microwave automatically calculates the time it will take. It then starts to thaw your dish while maintaining both the flavour and texture.
